After full consultation, patch testing is required for both REBRIGHT and RESURFACE one week before treatment, at a cost of £20 which is redeemable off the treatment price. Recommended timescale between treatments is every 4 weeks unless otherwise stated.

What should I expect before treatment?

All 3JUVE® treatments start with an advanced consultation to determine your specific goals. The treatment can then be tailored to your individual skin depending on your main concerns. Whether you are concerned with discolouration, loss of firmness or lines and wrinkles the 3JUVE® procedure can be customised to ensure the best possible results for your skin.

How long does the treatment take?

A typical 3JUVE® treatment takes approximately 1 hour, improvement is evident after the first session, but for optimal results 3 to 5 treatment sessions are often advised. Treatment is carried out every 2 to 6 weeks depending upon the level of rejuvenation required.

What should I expect after treatment?

Your skin could be a little red after treatment and depending on which technologies are utilised some bronzing and flakiness could occur.

How does the treatment feel?

A warm, heating sensation is felt during treatment with some mild stinging.

RESURFACE Fine Lines & Wrinkles

Er: YAG fractional laser targets both the superficial (epidermis) and deep (dermis) layers of the skin. It stimulates cell renewal which smooths out the texture of the skin. It also targets the dermis of the skin by promoting the relaying of collagen. This treatment can improve skin texture, reduce static lines, wrinkles and acne scarring, including stretch marks*.

Fractional Treatments	Approx. Time	Single	Course of 6	20% off course of 6
Top Lip	20mins	£75	£450	£360

REMODEL Tightening & Lifting

Radio frequency causes microvibrations (dermal heating) within the skin to help produce new collagen and elastin. This leads to a subtle lifting and tightening effect for the skin that has lost its firmness. This treatment is useful for area that have lost its firmness and tend to sag such as around the eyes and jawline.
